Senn Logistik GmbH

Then you have come to the right place. Whether full or part load, Senn Logistik GmbH is your ideal partner for all freight matters. With many years of experience and an extensive network of partner companies, we are able to meet every customer request.

"Deliver. In time. Point. Off."

Services

SENN LOGISTIK GMBH Reliability and Professionalism in the Logistics.

› Full Truck Loads (FTL)

We offer a comprehensive transport network, based on long-standing partnerships, with which we can cover European destinations for you both on a day-to-day basis and on a contract basis. From standard to mega and coil mega trailers, we can offer all body types on request.

› Just in Time

Deadlines are the order of the day in our business. Due to our clear focus on quality, we take into account all the circumstances that can affect your transport right from the planning stage in order to load and unload on time.

› SPOT and Contract Loads

Our competent team of transport managers can process and implement your short-term spot requests for the whole of Europe quickly and reliably. Our main focus is always on quality and thus on your satisfaction as a customer. From standard to mega and coil mega trailers, we can offer all body types on request.

› Sprinter Loads / LTL

For loads of up to 3.5 tons, we primarily rely on Sprinters. We are therefore able to offer the shortest delivery times throughout Europe. Our experienced staff will take care of every aspect of your transport, making sure your goods arrive safely and on time.

Our story

The SENN Group was founded in 2001 with the first company KS Kneissl & Senn Technologie GmbH. Originally based in Kufstein, they are now based in Erl. In addition to logistics services, the group also offers industrial supplies for various sectors. Since 2001 we have been characterised by continuous, sustainable growth.

Sustainability

At Senn Logistik GmbH, we are aware of the negative environmental impact of truck traffic. It is therefore important to us to make an active contribution to environmental protection while continuing to offer our customers high-quality service. We actively use photovoltaics & hydroelectric power, an e-car fleet and buildings only according to low-energy construction methods in order to reduce CO2 emissions as best as possible.

Through careful planning and efficient management, we can optimize the kilometers driven by our vehicles, thereby reducing fuel consumption and therefore emissions. We are convinced that as your logistics partner we play an important role for a "greener future" and therefore we proactively advocate for sustainable solutions.

This thinking is an integral part of our company philosophy and our promise to you and the environment.
